

# CLEANING & MAINTENANCE MANUAL

## IMPORTANT!

- Only follow the instructions mentioned here, and not any others which may be supplied to you.
- Before using the floor, remove any protective coating which remains from the manufacturing process, with a post-installation cleaning. This protective coating is only for the sake of preventing damage during transport and retail.
- All the recommended products are manufactured by Diversey, our cleaning and maintenance products partner. You can find a full global list of their local resellers at the following link, so that you know how to access these products within your market: <http://www.pavigym.com/maintenance.php>
- Should you have any questions about these cleaning products and their applications, please contact our **Customer Service** department: [customer.service@pavigym.com](mailto:customer.service@pavigym.com)

## OBLIGATORY POST-INSTALLATION CLEANING.

**Immediately after installation and before first use of the flooring.**

Product 1st step: Diversey Profi Floor Cleaner & Degreaser.

1. Mix a bucket of water with Profi Cleaner. The proportion should be 200ml Profi Cleaner for every 1L of water.
2. Apply the solution on the floor using a broom with medium strength bristles or a scrubber drier (see recommended material below).
3. Allow the solution to act for 20 min without allowing it to dry.
4. **IMPORTANT:** Rinse well with clean water and a microfiber mop or a scrubber drier as many times as necessary to ensure the elimination of the protective coating layer. If this is not done, the surface may be slippy.
5. Leave to dry completely.

Product 2nd Step: Diversey Profi Floor Cleaner & Degreaser.

1. Mix a bucket of water with Profi Cleaner. The proportion should be 100ml Profi Cleaner for every 1L of water.
2. Apply the solution on the floor using a clean mop or a scrubber drier.
3. Leave to dry completely
